PHT 615 Case Management Lab I

Credit 1

This is the first of four courses designed for students to develop problem solving & critical thinking skills while working in small groups with student centered learning. In this first course, students will be given simple cases involving real patients or simulated cases with a discrete musculoskeletal problem (joint limitation and pain) as a result of a common disease process or injury in young adults, & the mature adult of various socioeconomic & cultural backgrounds. Students are encouraged to work collaboratively to identify & practice the steps of clinical decision making according to the patient/client management model. For each case, the student is expected to identify the pathology, the impairments resulting from the pathology, the related functional limitations & the resulting disability, before establishing functional goals & a plan for intervention. A formal oral & written presentation of the case will be expected at the end of the course for each group. In this course, students are also introduced to reflective evaluation using self-assessment & peer assessment after each group meeting & after the formal oral presentation. Prerequisites: courses in curriculum sequence.

Investigation through specific readings in the psychology of disability and the socio-economic and cultural impacts on optimizing function for individuals with disability. Prerequisites: courses in curriculum sequence.

21559(30) 8 week Session 05/28 – 07/19/24 TBA TBA PH 213A

PHT 630 Prosthetics and Orthotics**Credit 3**

In this course students will learn to apply their knowledge of kinesiology, pathology and client management model to the care of individuals requiring prosthetic and orthotic devices. This course will also emphasize preventive foot care, pre and post-surgical physical therapy interventions and functional rehabilitation of individuals with congenital, traumatic and circulatory conditions requiring prosthetic or orthotics devices. Prerequisites: courses in curriculum sequence.

21564(30) 8 week Session 05/28 - 07/19/24 TBA TBA PH 218

PHT 634 Neurologic Management I**Credit 3**

The educational vision for this course is to develop reflective autonomous physical therapists qualified to maximize functioning and minimize disability in persons with Central Nervous System (CNS) Health Conditions. Teaching and learning strategies implemented facilitate the development of student professional affective, cognitive and psychomotor behaviors required for physical therapist practice. This course is section into two units of study: 1. Healthcare Management of Persons with Brain Conditions; and 2. Healthcare Management of Persons with Spinal Cord Conditions. Prerequisites: courses in curriculum sequence.

21560(30) 8 week Session 05/28 - 07/19/24 TBA TBA PH 213A

PHT 643 Musculoskeletal Management 1**Credit 3**

The course is designed for learning and teaching entry-level physical therapy students the healthcare Process of Problem Solving for Individuals with Neuro-musculoskeletal Disorders. The World Health Organization (WHO) concepts of Health, Functioning and Disability (ICIDH-2)1, together with the APTA Guide to Physical Therapist Practice are used to structure Learning into four (four) study units: UNIT 1: Principles of Healthcare for Individuals with Neuro-musculoskeletal Disorders UNIT II. Individuals with Head, Neck, Spine and Pelvis Disorders. Prerequisites: Courses in curriculum sequence.

21561(30) 8 week Session 05/28 - 07/19/24 TBA TBA PH 213A

PHT 645 Pediatrics**Credit 4**

This course is designed to prepare students to acquire safe, effective, and evidence-based pediatric physical therapy management skills for children with neuro-musculoskeletal, cardiopulmonary, and other pediatric physical therapy related impairments. This course utilizes the National Center for Medical Rehabilitation Research(NCMRR) model and the Guide to Physical Therapist Practice that include evaluation, differential diagnosis, treatment goals and plan, intervention strategies, and documentation of prognosis, progress, and functional outcome measures. This course emphasizes interaction with clients' family and multidisciplinary team members at various settings such as homes, schools, clinics, community centers, and hospitals to maximize the functional carry-over of the intervention. Prerequisites: courses in curriculum sequence.

21565(30) 8 week Session 05/28 – 07/19/24 TBA TBA PH 218

PHT 659 Case Management Lab IV**Credit 1**

This is the final course in a series of courses designed to enhance student's ability to engage in problem-solving, critical thinking skills in the examination, diagnosis, prognosis, and intervention and outcome assessment of simulated cases with critical and non-critical multi-system involvement. The emphasis of this course will be the incorporation of student's knowledge and skills acquired in the classroom and in the clinic to be competent practitioners. Students are expected to use relevant research to guide clinical decisions and interventions. It is also expected that students are competent in addressing simple and complex problems throughout the life-span. Competency in communication and collaboration with other health professionals in the evaluation of treatment outcomes, psychosocial and cultural aspects of health care is also expected. At the end of this course students should demonstrate good clinical judgment in the current health care environment, and incorporate in their problem solving exercise all the elements of good physical therapy practice.

21566(30) 8 week Session 05/28 – 07/19/24 TBA TBA PH 218

PHT 668 Research 111**Credit 2**

This course is designed to individually guide students to begin their EBP project, which allows each student to apply EBP to the processes of examination, evaluation, diagnosis, prognosis, and interventions of selected conditions across the lifespan seen in physical therapy.

PHY 191 Introduction Research Topics in Physics**Credit 1-3**

Designed for freshman level undergraduates. Emphasis will be placed upon introduction to areas of physics research, regular attendance at appropriate seminars, techniques of literature searches, and background study. This course may be taken twice. Prerequisite: Consent of the department chairperson.

21655(30) 6 week Session 06/11 - 07/19/24 TBA TBA TBA

PHY 203 Introductory Physics I-II with Calculus**Credit 3**

Introduction to physics for physics and science majors using more advanced mathematical approaches than PHY 201-202. Vectors, statics, torque, dynamics, Newton's laws, gravity, center of mass, momentum, impulse, work, energy, moment of inertia, angular momentum, elastic properties, fluids, oscillations, wave motion, sound, heat, temperature, and thermodynamics. Foundations of electricity, electric charge, Coulomb's law, Gauss's law, potential, capacitance, Ohm's law, dc circuits, magnetic field, Ampere's law, Faraday's law, Lenz's law, ac circuits. Geometrical and physical optics and introductory quantum physics. Co-requisites: MAT 151 and PHY 215 for PHY 203; PHY 216 and MAT 152 for PHY 204.
