

Director

Duties and Responsibilities

- Promote and facilitate cutting-edge research, including collaborative and interdisciplinary research, in areas related to the strategic goals of the University.
- Generate funding through federal and non-federal sources in the cancer field.
- Work closely with the Vice President for Research to become internationally recognized for cutting edge clinical-translational research of cancers that disproportionately affect ethnically diverse and underserved populations.
- Participate in the selection of the other members of the HUCRC research team to recruit individuals with complementary expertise who will be able to accelerate research progress.
- Where applicable, develop mutually beneficial connections with institutions of higher education, corporations, government agencies, industry and the community to develop partnerships and collaborative research.
- Build and provide sufficient support for a community of innovative researchers to enhance research capacity at the university and to increase internal and external research opportunities for faculty.

Requirements

- Successful track record of research, scholarly, and/or creative achievement in the field on cancer.
- Successful track record of academic leadership and team building.
- Strong organizational skills and ability to manage multiple priorities.
- Excellent written and oral communication skills.
- Strong Interpersonal skills.
- Ability to travel 25% of the year.

Qualifications

A doctoral degree in molecular biology, biotechnology or a related field is required with demonstrable evidence of a track record in research and grantsmanship in cancer field.
