Position: **Front-End/Senior Web Developer**
Department: Center for Information Technology
Closing Date: Open until filled.

The Center for Information Technology has an immediate opening for the full-time position of **Front-End/Senior Web Developer** to develop top tier web pages, interfaces and applications using WordPress, HTML, CSS, Adobe Suite, and other web technologies. This role requires excellent communication skills as you will be working with Visual Designers/Graphic Artists and Backend Developers/Programmers.

Job Description:

- Develop support and implementation for all marketing and promotions for Hampton University
- Enhance community awareness through electronic media and mobile application distributions.
- Work as technical liaison with multiple departments to ensure accurate and favorable representation online.
- Establish policies and procedures to optimize the planning, promotion and publication of campus activities and events.
- Evaluation, purchase, and procurement of necessary products and services to support the University mission.
- Develop optimized/cross-platform front-end using approved CMS and development and design tools.
- Develop functional prototypes to demonstrate concepts and to enable rapid iterative support for evaluative research.
- Collaborate with product managers, designers, backend engineers, and researchers to refine the user experience.
- Partner with engineering to ensure that interactive techniques and technologies translate through to products and services.
- To connect with the user interface development community to track latest trends and emerging technologies.
- Successfully manage stakeholder relationships collaborating with diverse audiences – Alumni, Staff, Faculty, Students, and Community
- Other responsibilities as determined by administrative mission and scheduling needs.

Requirements Include:
Experience and/or Certification in Web Development, Marketing or related discipline preferred, 2+ years of online experience, the ability to offer valuable perspective on features that are important to the customer experience, a proven track record of launching interactive web sites/applications / online promotions., demonstrated skills across a range of technologies including: video production, signage, data analytics, and proven in visual and interface design.

Qualifications:
- Formal training/education in graphic design and minimum of one to two years' experience in marketing, graphic design, and/or designing and developing website and promotional content.
- Desired technical skills and knowledge include advertisement design, web banner design, user-interface design, knowledge of interactive marketing, creativity, and user-focused techniques to improve interactivity.
- Ability to create and manipulate website designs with strong abilities, utilizing current coding tools and techniques.

Requirements:
- Must possess excellent communication skills and the ability to prioritize and handle multiple, concurrent projects and deliverables.
- Must be able to work well both independently and/or within a team environment. Experience working in an educational environment is a plus.
- Must have experience with the following systems, languages, and tools: Mac and PC platforms, Adobe Suite, WordPress, HTML, CSS.
