

**Dr. Graham Chakafana and students conducted research in the Chemistry Department at Princeton University under the Visiting Research Faculty Partnership**

Dr. Graham Chakafana and his two students Dillon Bethea and Keziah Harris spent the summer in Prof. Ralph Kleiner's lab conducting structural and functional analyses of proteins that regulate nucleic acid synthesis in *P. falciparum*. In July 2023, the students gave oral presentations of their research findings at a national symposium hosted by the Leadership Alliance Network in Hartford, Connecticut. Dr. Chakafana also gave an oral presentation at a symposium hosted by Princeton University in August 2023.
