

ECONOMICS PROGRAM

The **Bachelor of Science in Economics** provides rigorous training in applied economic analysis. Through the lens of economics, students examine market-based applications to community and infrastructure development.

All students are exposed to applications of economic techniques used in public, private, and international business environments. Through the study of standard economic models, students learn to identify, explain, and describe the major features and functions of an economy.

Successful completion of the major enables students to analyze, synthesize, and evaluate economic, social, and business issues.

Consistent with the mission of the University, the Economics Program seeks to:

1. Provide both majors and non-majors with high-quality economics courses that prepare them for:
 - o Graduate study in Economics and related fields
 - o Professional employment or community entrepreneurship
2. Enhance students' knowledge of the structure and operation of the U.S. market economy
3. Increase awareness and understanding of key economic issues, including fiscal and monetary policy

ECONOMICS MINOR REQUIREMENTS

The Economics minor requires **18 semester hours** in Economics (ECO), including:

- ECO 200
- ECO 201
- ECO 202
- Three approved ECO electives
