	ACKNOWLEDGMENT OF RECEIPT OF GUIDELINES FOR THE CLINICAL EXPERIENCE: MANUAL	
	D FORMS PACKET	_
-14	• • • • • • • • • • • • • • • • • • •	

Clinical practice is an integral part of the nursing student's experience. To assist students and faculty during the clinical experience, the Hampton University School of Nursing (HUSON) faculty and Dean have developed this manual. The guidelines outlined in this manual serve to assist in promoting positive student outcomes, enhancing socialization skills, refining critical thinking ability, and developing interpersonal communication skills. Additionally, it is hoped the instructions set forth will outline expectations, improve skills and knowledge development, increase self-confidence, and reduce anxiety and stress during clinical experiences.

This manual and forms packet provides directions for conducting evaluations. The forms provided are designed to evaluate the student, faculty, facilities, nursing staff, and overall clinical experience so students are best able to develop the competencies required of a professional nurse.

Clinical Experience Process

Overview

Clinical education is an integral part of the nursing curriculum. Students and faculty should anticipate an exciting clinical rotation. As an experiential learning process, evaluation of outcomes is a huge part of the clinical experience. This manual has been developed to equip students and faculty with practical guidance and tools for a successful learning experience.

Processes

- Faculty will review course objectives (outcomes) and clinical objectives and requirements with students.
 - o Students will define their goals for the clinical rotation.
- Faculty will personally review manual and forms to gain a clear understanding of the purpose and intent of each document within the guidelines.
- Faculty will establish a system for collection of daily evaluation forms and feedback and notify students of the same.
- Faculty will review manual with students.
 - Manual is available on the Hampton University School of Nursing website under student resources
 - Remind students of their responsibility for the information within the manual.
 - o Students will sign acknowledging they will abide by the policies outlined in the manual.
 - o Faculty will collect signature page and forward page to course leader for filing in student permanent record (Office of Student Academic Support).

Daily Clinical Evaluation

Clinical evaluation criterion is based on the Quality and Safety Education for Nurses (QSEN) competencies and NCLEX-RN (National Council Licensure Examination for Registered Nurses) test plan. Evaluation ratings used are as follows:

- **E = Exemplary** Functions at or above expected for the clinical level
- **A = Accomplished** Perform skills or has knowledge deficit in areas expected for clinical level, requires minimal guidance
- **B = Beginner** Demonstrates behavior with supervision/guidance
- **U =Unsafe**-Performs unsafe practice, inappropriate behavior, unable to complete tasks. Is unable to perform skills, has knowledge deficit in areas expected for clinical level. Daily anecdotal progress will be reviewed using the Daily Clinical Evaluation Form and other activities. Some events contributing to the clinical evaluation will be documented on the student-instructor conference sheet (Appendix A, HUSON Student Handbook) or the faculty-student consultation form. These anecdotal records provide objective data that will contribute to the final evaluation. Midterm and Final evaluations will include a narrative summary/statement.

Clinical Skills Checklist

- Clinical skills checklist will be distributed in NUR (V) 216 Foundations of Nursing: Practicum; NUR (V) 234 Concepts of Professional Nursing: Practicum Skills checklist will be signed off at each lab/clinical experience.
- 2. Clinical faculty are responsible for keeping track of the clinical skills checklist throughout the semester.
- 3. At the end of each semester clinical faculty will submit the clinical skills checklist to the Skills Lab Coordinator.

- 4. The clinical lab coordinator will place the skills checklist in a designated folder housed in the clinical skills lab.
- 5. At the beginning of each new clinical course, the clinical lab coordinator will distribute the clinical skills checklist to the respective clinical course faculty.
- 6. Only faculty, adjunct faculty, and HUSON approved preceptors can sign students off on clinical skills.
- 7. In order for the clinical skill to be marked as complete, the faculty, adjunct faculty, or HUSON approved preceptors must date, and initial the specified block for each skill completed.
- 8. Faculty, adjunct faculty, or HUSON approved preceptors must also initial, print, and sign the last page of the clinical skills checklist.
- 9. Each student must receive two satisfactory performances on all required skills in the clinical lab prior to performing the skill in the clinical setting.
- 10. Students who do not satisfactorily complete a required clinical skill in the clinical lab are required to complete remediation. Self-remediation will be completed using one of the following: media, practice, or reading. Once remediation has been completed, the student must re-demonstrate the skill to the nursing faculty member, and perform the skill satisfactorily. If the student is unsatisfactory the second time, one-on-one remediation with designated faculty is required.

Precepted/Observation Experience

- 1. Precepted experience will be arranged by the faculty/clinical coordinator and educator/designee of the respective agency.
- 2. Orientation of the facility will be facilitated by the course faculty per agency guidelines.
- 3. Orientation to the unit/department will be guided by the clinical faculty/preceptor.
- 4. Precepted observational experience includes various units within a health care agency and the community.
- 5. Preceptor to student ratio shall not exceed two students to one preceptor at any given time (18VAC90-20-95).
- 6. Faculty/clinical coordinator will make periodic visits to the site during the precepted experience.
- 7. Course faculty will review the *Clinical Skills Checklist Across the Curriculum* form with the preceptor at the beginning of the precepted/observation experience.
- 8. Students will be evaluated by the preceptor at the end of the precepted experience. Based on Evaluation ratings used are as follows: E = Exemplary- Functions at or above expected for the clinical level, A = Accomplished- Perform skills or has knowledge deficit in areas expected for clinical level, requires minimal guidance, B=Beginner- Demonstrates behavior with supervision/guidance, and U=Unsafe -Is unable to perform skills, has knowledge deficit in areas expected for clinical level, performs unsafe practice, inappropriate behavior, unable to complete tasks. This evaluation is advisory and will be forwarded to the faculty of record, for consideration in the midterm and final course evaluations.

Midterm

- Students will complete the student portion of the Midterm Evaluation Form, and submit one week before midterm
- Faculty will collect the completed form and complete the faculty portion.
- Faculty will meet with each student to review and sign the Midterm Evaluation Form and provide students with a copy of the Midterm Evaluation Form and keep the original in a secure place until the final clinical evaluation.
- Students with unsatisfactory performance at Midterm will be counseled (documented on "Memorandum" form (Appendix B, HUSON Student Handbook). Clinical Faculty will notify lead course faculty immediately.

All documentation will be collected at End-of-Term/Semester meeting.

Final Evaluation

- Faculty will complete the Final Clinical Evaluation Form at the end of the clinical experience (see Course Calendar). Preceptor feedback will be utilized to compile the final overall course evaluation
- Faculty will meet with each student. Review the Final Clinical Evaluation Form and have it signed by the student. Provide a copy of the form to the student.
- Students who fail the clinical portion of a clinical course will be unable to matriculate to the next series of clinical courses.
- All documentation will be collected at the end of each semester/term, and placed in the students'
 academic folder.

Evaluation of Clinical Site, Experience, and Faculty

On the last clinical day

- 1. Students will complete the Clinical Site Evaluation Form and Student Evaluation of Clinical Experience Form.
- 2. Students will complete the Clinical Faculty Evaluation Form. Clinical faculty will excuse self from room while students complete the Faculty Evaluation Form.
- 3. Faculty will instruct students to designate a person to collect and return (in a sealed envelope) the completed faculty evaluation forms to the Office of Academic Support Services.
- 4. Clinical Faculty will request that the Nurse Manager, Nurse Educator, Charge Nurse, and any other nursing staff who have worked with the students complete the Staff Evaluation of Clinical Experiences form.
 - i. Clinical Faculty will submit Student Evaluation Forms and Healthcare Agency Staff forms to the undergraduate secretary by the end of the semester/term.
 - ii. End of Course Evaluation forms (Student/Staff Evaluation of Clinical Experiences) will be tallied by secretarial staff and aggregated on one form and placed in the respective course folder on the shared drive within one week of receipt.
 - iii. The Clinical Skills Checklist will be submitted to the Skills Lab Coordinator for the purpose of filing in the student's permanent records (end of program only).

End of Semester/Term Meeting

- End of Semester/Term team meeting will be held with all clinical faculty
- Clinical faculty will review student evaluations and faculty evaluation of clinical sites, results will be forwarded to the clinical coordinator and documented on the End of Course Report
- End of Course report will be placed in the respective course folder on the shared drive
- Lead faculty will forward Student Evaluation to Academic Support for filing in student permanent record.
- Systematic plan for evaluation data [report findings to the faculty organization]

The Essentials of Baccalaureate Education for Professional Nursing Practice (2008)

The American Association of Colleges of Nursing (AACN) Essentials I–IX delineate the outcomes expected of graduates of baccalaureate nursing programs. Achievement of these outcomes will enable graduates to practice within complex healthcare systems and assume the roles of provider of care; designer, manager, and coordinator of care; and member of a profession. The nine essentials are as follows:

1. Essential I: Liberal Education for Baccalaureate Generalist Nursing Practice

• A solid base in liberal education provides the cornerstone for the practice and education of nurses.

2. Essential II: Basic Organizational and Systems Leadership for Quality Care and Patient Safety

• Knowledge and skills in leadership, quality improvement, and patient safety are necessary to provide high quality health care.

3. Essential III: Scholarship for Evidence-Based Practice

• Professional nursing practice is grounded in the translation of current evidence into practice.

4. Essential IV: Information Management and Application of Patient Care Technology

• Knowledge and skills in information management and patient care technology are critical in the delivery of quality patient care.

5. Essential V: Healthcare Policy, Finance, and Regulatory Environments

Healthcare policies, including financial and regulatory, directly and indirectly influence the nature
and functioning of the healthcare system and thereby are important considerations in
professional nursing practice.

6. Essential VI: Inter-professional Communication and Collaboration for Improving Patient Health Outcomes

 Communication and collaboration among healthcare professionals are critical to delivering high quality and safe patient care.

7. Essential VII: Clinical Prevention and Population Health

 Health promotion and disease prevention at the individual and population level are necessary to improve population health and are important components of baccalaureate generalist nursing practice.

8. Essential VIII: Professionalism and Professional Values

 Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to nursing.

9. Essential IX: Baccalaureate Generalist Nursing Practice

- The baccalaureate-graduate nurse is prepared to practice with patients, including individuals, families, groups, communities, and populations across the lifespan and across the continuum of healthcare environments.
- The baccalaureate graduate understands and respects the variations of care, the increased complexity, and the increased use of healthcare resources inherent in caring for patients.

Experiential Learning Theory and the Clinical Experience

The HUSON faculty has adapted David Kolb's (1984) theory of experiential learning to serve as a guide for learning during the clinical experience. This theory considers all types of learners and offers interventions to meet learners' needs.

© corrept david kolb, adaptation and design alan chapman 2005-06, based on Kolb's learning styles, 1984. Not to be sold or published. More free online training resources are at www.businessballs.com. Sole risk with user.

Figure 1: Model of Kolb's learning styles as adapted and designed by A. Chapman (1984).

Goal of the Clinical Experience

The goal of the clinical experience is to prepare students for practice as registered nurses. In addition to providing the didactic portion of the curriculum, the clinical experience gives students the opportunity to develop entry-level competencies.

Responsibilities and Accountabilities of Students

Clinical Course Preparation

HUSON currently uses CastleBranch as the vendor for all background checks. In addition to providing background check services, CastleBranch provides a "Student Immunization Tracker", Certified Profile. The CastleBranch.com service is student-funded. Students will simply order his or her background check online using the company's preferred method of payment, and the results are returned within days. In addition, a list of all documents required by HUSON or clinical sites is posted to Certified Profile in a checklist for all students. All background check, fingerprint and drug test results, as well as immunization records, medical records and important documents (CPR card, Liability Insurance, etc.) are stored online and are accessible by the student at any time.

Using the student immunization record management and document manager services will allow you to submit your health verification documents electronically to be organized and maintained by the company. You will have electronic access to your documents and the ability to provide access to the HUSON, practicum clinical agencies and to employers. Additionally, CastleBranch will send you weekly e-mail reminders of missing health records as needed by the School of Nursing. This will assist you in the process of having all of your required verifications on file before classes begin each semester.

Clinical requirements must cover the student for an entire academic year. Documentation for transfer students must be updated to correspond to the academic year after the semester in which they are enrolled.

Prior to beginning any courses that include a clinical rotation (starting with Nursing 215/216 or 233/234 or 315/316), the student must complete the requirements listed below. If the student fails to adhere to the set deadline, the student will be administratively dropped from the clinical course and corresponding didactic course on the first day of classes. There will be no exceptions! Clinical Clearance documents are managed for the School of Nursing by CastleBranch. Students are required to register online with CastleBranch and to submit all necessary documents. Required documentation must be uploaded into the secure platform by May 1st (Main Campus) and July 1st (COVB). Students must keep the original documents for their personal records.

Your results will be posted directly to your CastleBranch account. You will be notified if there is any missing information needed in order to process your order. Although 95% of background check results are completed within 3-5 business days, some results may take longer. Your order will show as "In Process" until it has been completed in its entirety.

Students are strongly encouraged to discuss the content of this policy with their parent(s) or guardian(s). The School of Nursing does not provide physicals or immunizations for students; therefore, the student incurs the cost of completing this school requirement. Additional requirements may be requested depending on the clinical agency where you will be completing your clinical work. This assures you of maximal opportunities in a variety of agencies.

1. Background Checks

A background check must be completed <u>annually</u>. The background check includes criminal history, sex offender, residency history, healthcare fraud and abuse. Students are <u>required to report all changes in the criminal history background check</u> to the Department chairperson. Failure to report changes are grounds for dismissal.

2. Drug Test

Students with positive a drug test not attributed to prescription medications will be dismissed from the nursing program and referred to the Dean of Judicial Affairs and Housing. (See official Hampton University student handbook, Living, Learning, Leadership and Service, and School of Nursing drug policy)

3. HIPPA and OSHA Nursing Compliance

Students are to complete HIPPA and OSHA compliance training annually. The (Health Insurance Portability and Accountability Act of 1996, Public Law 104-191) HIPAA privacy regulation requires "covered entities" to protect the privacy of individuals' health information. OSHA (Occupational Safety and Health Administration) is charged with regulating health and safety in the workplace, and is considered a public health authority and a health oversight agency under HIPAA.

4. Physical Examinations and Immunizations Status

The nursing student must submit satisfactory credentials regarding his or her health status. The student's health status is reviewed annually. Annual physical examinations are a means of protecting clients entrusted to students' care. A current health record from a health care provider or family physician including evidence of an annual physical examination and immunizations must be maintained by CastleBranch.com. Health statements from the previous year may not be resubmitted. Health Contractual agreements with cooperating agencies mandate the requirements of a PPD or a chest x-ray and documentation of immunity to Hepatitis B, diphtheria, pertussis, tetanus, rubella, rubeola, mumps, and varicella (chicken pox). Immunity may be demonstrated by proof of immunization ("shot record") or antibody testing. If there is no evidence of immunity, immunization against the specific disease is required. Changes in immunization requirements may occur periodically in keeping with current research, vaccine availability, and clinical agency requirements. If the student fails to adhere to the requirements, the student will be administratively dropped from the clinical course and corresponding didactic course on the first day of class.

Since one of the purposes of immunization is to protect the patient from inadvertent exposure to infection, exemptions from immunization are not accepted by clinical facilities and are therefore not accepted by the School of Nursing. The inability to be immunized for a medical reason may be considered on an individual basis. However, if outside clinical facilities cannot accommodate non-immunized students, there is the possibility that the requirements of the course, and for graduation may not be able to be met. Any issues with immunizations must be disclosed prior to enrollment. Due to COVID-19, some local healthcare agencies will not accept any student who has a declination for influenza (e.g. health or personal reasons).

Every year the student must submit a completed health statement (available through CastleBranch) that includes evidence of a complete physical exam and immunizations. CastleBranch information must be updated yearly. It is the students' responsibility to ensure they order the correct tracker (e.g. new student, continuing student tracker codes).

IMMUNIZATIONS: There must be current documentation of the following based on the recommendations of the Centers for Disease Control:

- Mumps, Rubella, Rubeola (MMR) 2 vaccinations or Positive antibody titers for all 3 components (lab reports required).
- Varicella (Chicken Pox) 2 vaccination or Positive antibody titer (lab report required) or medically documented history of disease.
- **Hepatitis B** 3 vaccinations or Positive antibody titer (lab report required).
- **Tetanus, Diphtheria & Pertussis (Tdap)** There must be documentation of a Tdap booster within the past 10 years (once after the age of 19).
- **Tuberculosis PPD** 2 step TB Skin test (1-3 weeks apart) or QuantiFERON Gold Blood Test (lab report required) or If positive results, provide a clear Chest X-Ray (lab report required). The 2 step TB Skin test is required for 1st year professional nursing students only, subsequent submission only, require 1 TB Skin test (within 12 months).
 - Every year each student must submit a completed health statement that includes evidence of a complete physical exam, immunizations, and tuberculosis skin test (PPD skin test) that includes documentation of the date it was placed, date it was read, and results. A chest x-ray cannot be substituted for a TB skin test. A chest x-ray is only accepted as a follow-up to a positive TB skin test.
 - o **TB Converter's** (Positive TB skin test reading or has been exposed to the disease)
 - A chest x-ray must be submitted for initial health screening for HUSON
 - After initial chest x-ray, annual screening will require you to submit a TB
 Questionnaire, validated by medical personnel or submit results from a TB blood tests (also called interferon-gamma release assays or IGRAs)
 - Chest x-rays are required every two years.
 - Please note: All students entering the clinical area for the first time will be required to have a two-step tuberculin skin test (unless you are TB Converter- see information above). This process requires the student to visit the doctor four times instead of two.
 - Sample procedure for Two-Step TST: (This example is only meant to give you an idea of what to expect for the two-step TST and what documentation is needed by HUSON.)

Visit 1	First TST placed. To be read in 48-72 hours; verify CDC and facility requirements.
Visit 2	TST is evaluated, measured, and interpreted. Please make sure outcomes are documented on the School of Nursing required forms. If applicable, the doctor will document results in millimeters (ex: 0 mm, 4 mm, and 12 mm).
	If TST is negative , get an appointment for the second test 7-21 days later.

	If TST is positive, no further testing is indicated. Have this documented as well.
Visit 3	Place the second TST if first was negative. Have placed in alternate arm.
Visit 4	Within 48-72 hours after the second test is placed, return for evaluation, measurement, and interpretation of the TST. Your doctor will document results in millimeters (ex: 0mm, 4 mm, and 12 mm).

Seasonal Flu Vaccine

- Annually students must receive the updated seasonal flu vaccine or a Declination waiver for the current calendar year and update their certified profile by the deadline designated by the School of Nursing.
- Declination must be signed by healthcare provider (Declination/Waiver form provided within CastleBranch). Influenza declination - Several clinical sites require staff/students to wear a mask when providing nursing care if they have not received a flu shot. Due to COVID-19, some local healthcare agencies will not accept any student who has a declination for influenza (e.g. health or personal reasons)
- o Flu shots may be obtained through the Hampton University Health Center or any local drug store for a small fee.

The student will not be allowed to enter a clinical practicum class if they are not clinically cleared to include an appropriate physical examination form, submitted on time and completely validated. It is essential that students avoid jeopardizing their enrollment in the nursing practicum courses. The student must contact a health care provider for further information on costs for examinations, lab work, and immunizations.

5. Cardiopulmonary Resuscitation

Current certification in cardiopulmonary resuscitation is required to enroll and remain enrolled in nursing clinical practicum courses. Students must earn and maintain certification from the American Heart Association (BLS for Health Care Providers) in accordance with the agency, prior to beginning all clinical courses. **No online certifications will be accepted.** Certification must remain current while enrolled in the HUSON program.

6. State Licensure (LPNs and RNs)

Licensed practical nurses and registered nurses must maintain unencumbered state licensure and demonstrate proof annually.

7. Liability Insurance

Annually, all students are required to obtain and show PROOF of liability insurance to cover the periods of enrollment in practicum courses. Students are required to verify the amount of coverage (\$1,000,000/6,000,000) required with the Office of Student Academic Support Services, faculty advisors, and/or clinical instructors prior to purchasing a liability insurance policy. The policy must show evidence of coverage, list the start and end dates of coverage, and amount of coverage. Students are encouraged to purchase liability insurance with any company of their choice. Verification of coverage must be submitted to CastleBranch.com

The public is increasingly demanding that health professionals be responsible and accountable for all actions and judgments when practicing their profession. Professional nurses assume responsibility for their actions and

judgments in both dependent and independent nursing roles. The rate at which professional nurses have to face legal proceedings as a result of liability suits is rapidly increasing, and nursing students can also be held liable for their actions and judgments. The School of Nursing feels strongly that liability insurance affords protection for the student, his/her family, School of Nursing, Hampton University, and clients. Therefore, professional liability insurance must be maintained by each student while in the HUSON program.

8. Acknowledgement of Risks

For the safety and liability of students in the clinical setting, all students must sign an Acknowledgement of Risks statement prior to entering any clinical rotation. Other guidelines may be accessed at the following website:

https://www.education.virginia.gov/media/governorvirginiagov/secretary-of-education/pdf/Secretary-COVID-19-Health-Education-Advisement-(5-26-20).pdf

Additionally, due to the COVID-19 pandemic, the School of Nursing has implemented a policy in which mandatory compliance by all students enrolled in its programs is necessary. This policy is located in the HUNUR Community in Blackboard under Policies.

Acknowledgment of Receipt - Clinical Experience Manual and Forms Packet

All students are to acknowledge receipt of the Clinical Experience Manual and Forms Packet with their signature.

Attendance/Absences

The student must complete required clinical hours for each course in order to satisfactorily meet the course objectives and requirements set forth by the Virginia Board of Nursing.

In planning for the clinical practicum in nursing, instructors select clients for student experience or students select clients under the instructor's guidance. In doing so, the instructor assumes responsibility for the care and health promotion of those selected clients.

The nursing staffin clinical agencies maintains responsibility for clients and therefore has the right to assume that the needs of these selected clients (within the assigned functions of the student) will be met during the period of the student's assignments.

Tardiness (arriving more than 5 min. after start of class), failure to report to duty, and/or failure to notify the instructor of absence can result in client care being jeopardized. The development of a deep sense of professional responsibility toward clients and professional colleagues is a basic objective of the nursing curriculum. It is inevitable that if students fail to achieve this requirement this failure will be reflected in the clinical practicum grade score will be decreased by one letter grade or + or – drop for every day absence. In addition to this policy, several regulations must be observed:

The nature of the student's clinical experience is such that **attendance** is **mandatory**. Excused absences may be granted only in exceptional cases by permission of the (a) instructor in charge, (b) Undergraduate Department Chairperson, or (c) Dean of the School of Nursing.

Students who are unable to report for a nursing laboratory or clinical experience must contact the (a) instructor, and (b) nursing unit to which they are assigned, no less than one half hour prior to the beginning of the laboratory or practicum period by telephone, etc. **No messages will be accepted from a third party.**

An unexcused absence is considered to be a failure to observe a regulation of the School of Nursing. An overall grade reduction will be recorded for each unexcused clinical absence.

Students who are consistently negligent in their professional responsibilities will be reported to the Undergraduate Department Chairperson and the Assistant Dean for Academic Affairs. Policies regarding the progression and retention of students, which have been approved by the faculty and are outlined in the Student Handbook, will be enforced by the School of Nursing when students do not meet professional responsibilities.

Consequences for Violation of Attendance Policy

- 1. Class absences may not exceed more than 10% of class meetings (excused or unexcused) in a given semester. (varies based on number of credits for the course)
- 2. Students who exceed absences of 10% will be referred to the course lead faculty.
- 3. Student will provide documentation of absences to the course lead faculty prior to meeting with the committee.
- 4. The course lead faculty will develop an individualized action plan for progress through the remainder of the semester (if applicable).
- 5. Student will meet with the course lead faculty to discuss and finalize the action plan.
- 6. Nonadherence to the attendance policy may result in dismissal from the undergraduate nursing program
- 7. The nature of the student's clinical experience is such that attendance is necessary.
- 8. Excused absences may be granted only in exceptional cases by permission of (a) the instructor in charge, (b) the Department Chairperson, and (c) the Dean of the School of Nursing. A student must not be absent from the clinical laboratory, whether the absences are excused or unexcused.
- 9. Students who are unable to report for nursing laboratory (clinical) experience must communicate the absence (a) to the instructor and (b) to the nursing unit to which they are assigned, not less than one half hour prior to the beginning of the laboratory or practicum period. **No messages will be accepted from a third party.**
- 10. Unexcused absences will be considered a failure to observe a regulation of the School of Nursing. A reduction in letter grade will be recorded for each unexcused clinical absence. Students that report to clinical late will be given a warning the first time, and will be removed from the clinical site with subsequent tardiness resulting in a letter grade reduction.
- 11. Students who are consistently negligent in their professional responsibilities will be reported to the Department Chairperson and the Dean of the School of Nursing. The general policies regarding progression and retention of students, which have been approved by the faculty and are stated in the Department of Undergraduate Nursing Education Student Handbook will be implemented by the School of Nursing.

***The School of Nursing must report the academic standing of each graduate of the Undergraduate Program to the Board of Nursing of the state of Virginia or other states as necessary. This is necessary in order to allow graduates to sit for the National Council Licensure Examination (NCLEX) examination that qualifies them to practice as a professional nurse. Students with deficient numbers of clinical hours due to absences will be unable to meet program outcomes and are not eligible to sit for the National Council Licensure Examination.

Professional Dress and Behavior

Student

Professionalism in Clinical Experiences

Learning experiences demonstrating the application of knowledge, values, and skills occur in the clinical area. Ethical standards of conduct between the student and instructor must always be observed. At no time should the student be impolite in expressing feelings or opinions while in clinical agencies. Using cellular/portable telephones and/or beepers is not acceptable.

Anecdotal Records

The clinical instructor will keep an account of observations of a student's performance, and these observations will be shared with the student (see Daily Clinical Evaluation Form). The student has the opportunity to write a statement in response to the instructor's observations.

Uniform and Appearance

The primary purpose of the nurse's uniform is to protect the client from the outside environment. In addition, the uniform provides a clean, comfortable, and professional outfit to wear in the clinical setting and clinical laboratory. Over the many years that nurses have worn uniforms, these uniforms have become a symbol of the nursing profession to the client and general public.

As professional persons, nursing students must take pride in being well-groomed. The nurse's uniform is appropriate only in the clinical setting; therefore, it is considered inappropriate to wear the uniform as street apparel. The student uniform identifies the student as a representative of Hampton University, and the student's behavior reflects the level of respect the student has for herself/himself, the School of Nursing, and the nursing profession. Appearance reflects who the student is now as well as the type of professional nurse the student expects to become in the future. At all times, nursing students have a responsibility to appear at their very best, which means every student should always be well-groomed and suitably dressed for the occasion.

1. Appearance

	When in uniform, check yourself for the following:
Hair	Hair should not touch the collar and be neat and well-controlled. If necessary, the student should wear a hairnet. Any devices, such as barrettes and rubber bands, must match the student's hair color and not be decorative.
Nails	Nails must be kept clean and short. Only clear nail polish may be worn when in uniform. Acrylic nails are prohibited for infection control purposes.
Shoes	Clean, white leather nursing uniform shoes with laces in good repair. Uniform clogs/modified clogs or tennis shoes may not be worn. For the community health rotation, students must wear a flat, closed-toe shoe that is black or dark blue. No tennis shoes or clogs are allowed.
Hose	Clean, with no runs. Hose must be white or in a color that matches the skin tone.
Jewelry	A plain wedding band may be worn with the uniform; it may not be worn in a unit where surgical asepsis or isolation techniques are required.
	One pair of small stud earrings may be worn in the earlobes. No other jewelry may be worn. If a student wishes to have a ring while in uniform, it is suggested that it be secured with a safety pin under the uniform.
	Jewelry in the nose, eyebrows, tongue, or other body piercings are prohibited while in uniform and at clinical agencies.
Cleanliness	Each part of the uniform must be clean and in good repair at all times. Body cleanliness without offensive odors is required. Perfume or cologne may not be worn in the clinical area. Cleanliness is one of the prerequisites of good health. Beards and mustaches must be neat and well-groomed.
Make-up	Makeup must be neatly applied and in good taste. In order to present a professional appearance, students are requested to apply makeup in moderation.

Other

Tattoos must not be visible. Any covering of tattoos must be able to resist all decontamination activities, such as washing or using antimicrobial agents. No gum chewing. Perfumes and body sprays are prohibited.

2. The Uniform and Required Equipment

A. Requirements of the Complete Uniform

- Light blue zippered front pantsuit with the Hampton University School of Nursing insignia on the upper left sleeve
- White hose
- White shoes
- White laboratory coat
- Identification pin (white with blue lettering)
- Students who are registered nurses may wear an all-white uniform with the Hampton University School of Nursing insignia on the upper left sleeve and a name pin with "RN, Hampton University Student"

B. Equipment Required in the Clinical Agency

- Pen (black ink) and pencil
- Pocket-size notebook
- Watch with a second hand
- Bandage scissors
- Stethoscope
- Penlight

Uniform for Male Students

- Light blue trousers
- Light blue zippered front, jacket length top with the Hampton University, School of Nursing insignia on the upper left sleeve
- White undershirt
- White socks
- White shoes (no sneakers or athletic wear)

C. Regulations Related to the Wearing of the Complete Uniform

- The complete uniform is worn in the following areas:
- Clinical agency when administering client care
- Clinical lab
- Special ceremonial occasions when the uniform is requested or required

3. Other Considerations Regarding the Uniform

- A laboratory coat is not worn when administering client care. A laboratory coat is only to be worn to provide the student with additional warmth outside of the clinical area.
- Certain clinical areas require specific modifications in uniform. The instructor will discuss these modifications with the student. It is expected that the student's appearance will meet standards for the specific area of clinical practice.
- Students with religious regulations regarding headwear are to follow the guidelines stipulated by Hampton University's Office of the Chaplain.

• If at any time, the student's uniform and appearance do not meet Hampton University standards, the student will be dismissed from the clinical area in order to make necessary adjustments. The student's clinical evaluation will reflect nonconformity with uniform and appearance regulations and lost clinical time.

4. Purchase of Uniforms and Equipment

A. Students Must Meet the Quota for Uniforms and Equipment

B. The Uniform Quota to Be Ordered

- One to two dresses and/or pantsuits
- · One identification pin, white with blue lettering
- One white laboratory coat
- Students should be dressed professionally (site-specific attire) and wear an approved School of Nursing student ID badge.

Connecting Didactic to Clinical Experience

Essential Functions

A. Procedures Students May Perform

The following procedures can only be performed under the direct supervision of the clinical instructor, nurse preceptor, or charge nurse until the student understands how to safely perform procedures.

- Sterile and non-sterile dressing changes
- Maintain and monitor nasogastric suction and enteral feeding
- Routine ostomy care
- Perform tracheostomy care
- Foley catheter placement or insertion, irrigations, specimen collection, routine care, and removal
- Perform nasotracheal suctioning
- Assist with physician-initiated procedures to include, but not limited to, the following:
 - Lumbar puncture
 - o Bone marrow biopsy
 - Chest tube insertion
 - Thoracentesis
 - o Paracentesis
 - o Liver biopsy
 - o Epidural catheter placement
 - o Central line placement
 - o Orthopedic procedures
 - Maintain chest drainage
 - o Nasogastric and enteric tube placement

B. Procedures Students May Not Perform

Students may observe, but not participate, in the following procedures independently. **This also** includes any other duties the clinical faculty/agency deems students are not competent to perform.

- Cardioversion/defibrillation
- Conscious sedation

- Surgical procedures
- Endoscopy procedures
- Blood administration—Initiate blood and blood products
- Chemotherapy
- Cannot access tunneled, or surgically inserted catheters (e.g. mediports)
- No IVP unless under the direct supervision of the clinical faculty
- Students cannot change IV pump programs unless under faculty supervision
- Hemodialysis
- Cardiac catheterization and interventions
- Chest tube removal
- Temporary pacing
- Childbirth delivery
- Abortion procedures
- Induction of labor
- Open chest resuscitation
- Circumcision
- Apply internal fetal monitoring electrodes
- Arterial punctures
- Blood sampling from central venous/arterial catheters
- Removal of central venous or arterial catheters
- Subclavian tubing changes
- Heparin and insulin dosage verification unless under faculty supervision

C. Venipuncture

Students may perform this procedure only while under the direct supervision of a clinical instructor or preceptor.

D. Medication administration

Oral, rectal, vaginal, optic and topical medications may be given under the supervision or direction of the clinical instructor or preceptor after safely demonstrating application of the rights of medication administration.

E. IV push medications

The following IV push medications may be administered by a student only under the direct supervision of the clinical instructor or preceptor as deemed applicable by agency policy:

- Narcotic analgesics
- Diuretics
- H2 antagonists
- Antibiotics
- Antiemetic
- GI Stimulants
- Valium
- Steroids

F. Students <u>Must Not</u> Administer the Following Medications Per IV Route:

- Versed
- Dilantin
- Antiarrythmics

- Beta blockers
- Calcium channel blockers
- Investigational drugs
- Cytotoxic agents
- Thrombolytic agent
- Neuromuscular blockage agents
- Continuous IV sedation (i.e. Propofol, Fentanyl)
- Inotropics (Digoxin)
- Anticoagulants (may monitor continuous infusions under supervision of instructor/preceptor)
- G. Students May Not Take Verbal or Telephone Orders on Their Own.
- H. Students May Not Call Health Care Providers.
- I. Students May Not Obtain Patient Signatures on Informed Consents.

- 1. Must understand and follow policies and procedures of the School of Nursing while in the clinical agency.
- 2. May participate in the direct care of patients under the supervision of the RN assigned to the patient with the approval of the clinical instructor. May provide documentation on a patient's permanent record after collaboration with the clinical instructor. Such documentation must include the student's name, title, and co-signature of the clinical instructor.
- 3. May administer medication following these guidelines:
 - IV medications given in accordance with hospital policy and under the supervision of a clinical instructor or preceptor.
 - Medications given by other routes (IM, SQ, IV, IVP, IVPB, PO, SL, rectally, topically) will be given under the supervision of the clinical instructor or preceptor.
- 4. Be prepared to complete patient care assignment and articulate basic, pertinent theoretical knowledge prior to participating in direct nursing care.
- 5. Must adhere to agency policies relative to the following:
 - Parking
 - Dress code
 - Documentation
 - Client care
 - Confidentiality
- 6. May use the agency library
- 7. May use cafeteria facilities
- 8. Must notify the clinical instructor and unit personnel when unable to report for duty due to illness or other emergency (see Student Handbook)
- 9. Immediately notify the clinical instructor if there is an illness or injury on the unit.
- 10. May assist in performing CPR if there is a current BLS certification from American Heart Association (AHA) on file with the Hampton University School of Nursing
- 11. Will give report on patient(s) cared for prior to leaving the unit for breaks and at the end of clinical day to the designated staff nurse.
- 12. Students must display appropriate name tags and student uniforms or lab coats any time they are in the clinical area. If lab coats are worn, appropriate professional dress is required. No jeans or shorts are permitted (see uniform guidelines).
- 13. Student projects—Surveys and questionnaires for student projects must be approved by the appropriate agency IRB, administrative oversight, and Hampton University IRB committee before distribution. Permission for interviews related to student projects must be obtained before the interview is conducted.

Policy

Responsibility and Accountability

It is the policy of Hampton University School of Nursing that student nurses provide nursing care only under the supervision of a school-affiliated clinical instructor. In accordance with § 54.1-3001 of the Code of Virginia, a nursing student, while enrolled in an approved nursing program, may perform tasks that would constitute the practice of nursing. The student shall be responsible and accountable for the safe performance of those direct client care tasks to which he has been assigned.

• Students represent the School of Nursing and must present themselves as ambassadors of the nursing program.

- A report of unprofessional behavior will result in the student being counseled, and the student's status subject to review by the Assistant Dean for Academic Affairs.
- Students are encouraged to send a thank you note to their units.

Definitions

Student Nurse: An individual currently enrolled in a clinical course at a school of nursing who provides patient care under the supervision of a clinical instructor and/or approved licensed nurse.

Supervision: The direct observation of a student by a clinical instructor.

Clinical Competency: An assessment of the student's ability to function in a clinical setting.

Clinical Expectations

- 1. Students will complete a hospital orientation prior to the first clinical experience.
- 2. Students will wear a School of Nursing identification badge.
- 3. Students will participate in pre-conference prior to engaging in patient care.
- 4. Students will obtain report from the nurse of record prior to engaging in patient care.
- 5. Skills and procedures will be performed in accordance with hospital policies and procedures.
- 6. Student assignments will be posted in a conspicuous location on the nursing unit in accordance with agency policy. Assignments will clearly delineate student responsibilities.
- 7. Posted assignments will maintain patient confidentiality and will not include any patient information (i.e., name, patient initials, birthdates, medical record number or diagnosis). Room numbers can be listed.
- 8. Students may perform skills as appropriate to their scope of practice (RN or LPN) and assist with physician-initiated procedures under the direct supervision of the assigned clinical instructor and/or unit RN.
- 9. Students may administer medications under the supervision of a clinical instructor or licensed nurse. Below are the guidelines for medication management:
 - a. Students must have the patient's primary nurse or clinical instructor present while in the medication room.
 - b. The clinical instructor reviews all medications with the student nurse and co-signs all medications in the MAR.
 - c. Student nurses administering any initial dose of medication to a patient must be directly observed by the clinical instructor.
 - d. High alert medications require two RN verifications in addition to the student nurse.

Documentation

All documentation by students will be cosigned by the clinical instructor or licensed nurse. If documentation in the agency electronic health record. Students must document client findings (e.g. assessment, medication administration, nursing care plan) in the school supplied electronic health record (EHR Tutor).

Evaluation

- a. Students must evaluate the clinical faculty at the end of each rotation.
- b. Students must evaluate the clinical experience at the end of each rotation

Clinical Policies

1. Clinical Orientation

- a. The first clinical day is generally reserved for orientation. All students in clinical sections should have had a refresher skills experience at the beginning of the semester to reorient them to the clinical skills required of nurses.
- b. Faculty must arrange an orientation of the clinical unit/site at least one week prior to the start of the clinical rotation.
- c. Faculty will provide the unit manager/clinical educator with a list of clinical rotation objectives prior to the start of the clinical rotation.
- d. Clinical orientation must occur on the day the students are scheduled for the clinical experience in the clinical agency. However, students may be asked to arrange a time outside of the schedule to complete a training session on their own (e.g., reviewing and completing agency orientation activities, quizzes, etc.). Students are required to attend **all** clinical meetings.
- e. Clinical courses require students to complete skills acquisition or simulation labs on campus. These experiences do not count toward clinical hours for the semester, however clinical faculty are expected to assist in the lab with skills acquisition and supervision of students during these exercises (In accordance with Virginia Board of Nursing Regulations).

2. Clinical Clearance

a. Students must be cleared to attend clinical at the beginning of each semester. Clearance is given when all health forms, vaccine records, blood titers, current CPR record, etc., have been submitted to and positively verified by CastleBranch.com. Clinical faculty will be informed by the chairperson/clinical coordinator of the status of their students' clinical clearance. Any student not cleared are not to attend clinical, and will be administratively dropped from the course.

3. Required Documents for Faculty Members

- a. Faculty members are required to submit results of annual PPD tests to the designated Administrative Assistant. Faculty members who have a positive TB test must submit the results of a chest X-ray completed within the last five years. A yearly **TB Questionnaire** is available at the Hampton University Health Center. The questionnaire must be completed and filed in the School of Nursing.
- b. The nursing faculty is required to provide documentation of an annual physical exam.
- c. All faculty members must submit copies of current nursing licenses and BLS certification.
- d. All faculty members must provide proof of liability insurance annually.
- e. All faculty members must maintain an active unencumbered Virginia or compact license to practice nursing.

4. Meeting Attendance for Clinical Faculty

- a. Clinical faculty is required to attend meetings with the lead faculty of the courses to which they are assigned.
- b. Clinical adjunct faculty is encouraged to attend faculty organizational meetings held on the last Friday of each month from 1:00 p.m. 3:00 p.m.
- c. Clinical faculty is required to attend scheduled pre and post-clinical meetings with lead course faculty.
- d. Clinical faculty is required to hold pre- and post-conference with students each clinical day.

Clinical Dress Code

Faculty must conform to the clinical agency's dress requirements for professional nurses. This includes wearing the required uniform, lab coat, and School of Nursing name pin or badge. Faculty are required to wear blue scrubs and a white lab coat, displaying their Hampton University identification.

Faculty Absence from Clinical

- a. The faculty member is responsible for notifying the Undergraduate Chairperson of an unforeseen absence due to illness, injury, etc.,
- b. Faculty members are responsible for notifying students of an unforeseen absence from a clinical due to illness, injury, etc.
- c. Faculty must notify the clinical agency not to expect students on this day.
- d. Clinical faculty should collect contact information from each student at the first clinical meeting. In an effort to speed the dissemination of information within a clinical group a Phone Tree is suggested.

Evaluations

- a. Clinical evaluation on each student **must** be completed daily, at midterm, and at the end of the rotation (final).
- b. The Clinical Evaluation Form must be provided to the students in Blackboard.
- c. Clinical evaluations of each student must be submitted to the course lead faculty at the end of the rotation.
- d. All evaluations of clinical agencies and students will be submitted to lead course faculty for submission to the Office of Academic Support Services.
- e. Complete the Clinical Site Evaluation and submit to lead faculty at the end of the rotation

Dosage Calculation Test

- a) Students enrolled in a clinical nursing course are required to take a timed dosage calculations proficiency examination at the beginning of each clinical nursing course.
- b) Passage at the 90% level is a requirement of each course.
- c) Students must successfully pass the examination prior to entering any clinical agency.
- d) Students who are unsuccessful on the examination must engage in remediation prior to the retake of the examination.

Untoward Events

- a. All untoward events must be documented.
- b. Untoward events include any act of omission or commission that could cause harm to a patient, student, or any other individual in the clinical setting. When such an event occurs, the involved individual and instructor must complete an Incident Report and submit the report to the faculty of record for the course.

- a. Clinical faculty are required to have a Hampton University e-mail account in order to be added to Blackboard, submit grades, and communicate important messages.
- b. Hampton University e-mail can be accessed via the internet through www.hamptonu.edu.
- c. All faculty are issued a Hampton University e-mail account after signing their contract through the Office of the Provost.
- d. Faculty is expected to respond to e-mail within 24-48 hours of receipt of the e-mail.

Faculty Expectations of Students

- a. Students are responsible for meeting the following expectations:
 - Prepare and administer medications safely.
 - Perform delegated nursing procedures and treatments correctly.
 - Protect patients from environmental hazards.
 - Communicate important changes in patients' conditions to the appropriate individuals.
 - Carry out all assigned duties and inform appropriate persons when unable to do so.
 - Seek faculty assistance in aspects of patient care in which he or she lacks knowledge or skill.
 - Report to the agency or unit appropriately dressed and prepared to provide knowledgeable care.
 - Notify the instructor and agency prior to the start of a scheduled shift if absence or tardiness is unavoidable.
 - Recognize and assume responsibility for the consequences of her/his own actions.
 - Organize workload and set priorities appropriate to the patient setting.
 - Maintain confidentiality regarding patient health records and health status.
 - Avoid behaviors that threaten patients or colleagues physically, verbally, or psychologically.
- b. Students will avoid the following:
 - Disruption or obstruction of teaching and administration in the department or on campus, theft, damage, or defacement
 - Behavior that threatens the physical, psychological, or emotional health, safety, and/or dignity of any person
 - Interference with campus security personnel
 - Violation of alcohol and drug policy
 - Falsifying or altering records
 - Misuse of Hampton University's technology system
 - Any violation(s) of Hampton University Code of Conduct
 - Violations of Social Media Policy

^{**} Whenever doubt exists in the mind of the instructor about a student's conduct regarding adherence to professional standards or the provision of safe patient care, the instructor should immediately consult with the course lead faculty. In addition, a record of advisement (student-Instructor conference form) should be completed and submitted to the course lead faculty.

I.V. (Intravenous) Push Policy

- a. Medication administration through the intravenous push (IVP) route involves drawing the medication into a syringe, attaching the syringe directly to the vascular access device or IV tubing, and pushing on the plunger of the syringe.
- b. There are risks involved in any type of medication administration, but the consequences involved in delivering medication by IVP tend to be more serious than when using other methods of administration.
- c. Therefore, the following policy has been put in place:
 - Sophomore (NUR 216/234) students will not administer IVP medications.
 - Junior students will not administer IVP medications until completing the IV infusion/meds skills provided in the first week of Adult Health Nursing I (N346).
- d. Throughout the nursing program, students may only administer IVP medications under the following conditions: The clinical instructor is directly supervising the I.V. Push medication administration.
- e. The healthcare agency allows for the student to administer the medication by the IVP route.
- f. In Leadership and Management (N443), IVP medications may be administered under the direct supervision of the RN preceptor. This route must **never** be practiced independently.
 - d. Direct supervision means the clinical instructor or RN preceptor is physically present throughout the entire procedure.
 - e. The clinical instructor should be consulted regarding healthcare agency policy on IVP medication administration.
 - f. Generally, healthcare agencies allow for IVP med administration by students with the exception of certain medications (chemotherapy, experimental drugs, and critical care situations) under direct supervision of clinical faculty.

General Information

Evaluation of Faculty

- a. Clinical faculty may receive a written evaluation by the course lead faculty, the clinical coordinator or the Undergraduate Chairperson as requested or needed.
- b. Clinical faculty must adhere to the ANA Code of Ethics *American Nurses' Association (2001). Code of Ethics for Nurses. Washington, DC: The Association. The Hampton University School of Nursing faculty subscribes to the Code of Ethics of the American Nurses Association and expects students to do likewise. The ANA Code is as follows:
 - The nurse in all professional relationships, practices with compassion and respect for the inherent dignity, worth and uniqueness of every individual, unrestricted by considerations of social or economic status, personal attributes, or the nature of health problems.
 - The nurse's primary commitment is to the patient, whether an individual, family, group or community.
 - The nurse promotes, advocates for and strives to protect the health, safety, and rights of the patient.
 - The nurse is responsible and accountable for individual nursing practice and determines the appropriate delegation of tasks consistent with the nurse's obligation to provide optimum patient care. The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence and to continue personal and professional growth.
 - The nurse participates in establishing, maintaining, and improving health care environments and conditions of employment conducive to the provision of quality health care and consistent with the values of the profession through individual and collective action.
 - The nurse participates in the advancement of the profession through contributions to practice, education, administration, and knowledge development.

- The nurse collaborates with other health professionals and the public in promoting community, national, and international efforts to meet health needs.
- The profession of nursing, as represented by associations and their members, is responsible for articulating nursing values, for maintaining the integrity of the profession, and its practices and for shaping social policy.

Policy

Position Description: Adjunct Faculty Member

Adjunct professors at HUSON serve as clinical and/or classroom instructors in various courses. Candidates must have substantial, relevant experience in clinical nursing and hold or be in the process of completing a master's degree in nursing. Adjunct faculty members are expected to maintain high academic standards consistent with those of full-time faculty. Responsibilities include all or some of the following:

- Be present for orientations to labs, courses, and School of Nursing procedures.
- Supervise and assist students in the Nursing Skills Lab.
- Supervise and assist students during agency clinical rotations.
- Collaborate with full-time faculty on courses, clinical experiences, and assignments.
- Communicate with agency personnel regarding student clinical placements and progress.
- Orient students to clinical agencies.
- Conduct pre- and post-conference daily.
- Evaluate students in clinical practice through direct, consistent observation, and evaluation of paperwork and documentation.
- Evaluate students' performance on papers, tests, etc., in didactic courses.
- Attend selected departmental meetings as requested by the Undergraduate Chairperson.
- Make sure students complete required number of clinical hours for the Clinical rotation.
- Make sure students meet set clinical objectives
- Make sure students complete requirements for clinical experience as per the set grading rubric.

Terms of Employment

Adjunct clinical faculty members are appointed to the rank of instructor in the School of Nursing. All adjunct faculty members are expected to wear a badge with their name, and credentials that is clearly visible at all times while working with students. Adjunct faculty is appointed on a one-semester basis for a maximum load of two courses unless a special exception is granted by the Chancellor & Provost. The appointment of the adjunct faculty member becomes effective when the assigned classes are officially authorized. The offer of employment may be withdrawn for any of the following reasons: insufficient enrollment for the course for which one has been hired, concerns regarding performance, or a change in the needs of the department. If an offer of employment is withdrawn, the individual will be notified immediately.

Clinical Faculty Requirements

Faculty members teaching in the clinical setting must complete the following requirements:

Current CPR Certification

Your CPR certification must be a <u>professional level</u> course, BLS for the Healthcare Provider, from the American Heart Association. This course is the <u>only</u> course that will be accepted for certification.

Current PPD

A note from your healthcare provider with the date applied, date read, and result of the test will be sufficient. Faculty who are PPD convertors should have their provider complete a TB screening form. Results of a chest x-ray must be submitted. A form may be obtained from the Hampton University Health Center or the provider.

Drug Screening

Post-employment testing includes random testing.

Background Checks

Hampton University performs a criminal background check as part of the hiring process; however, the School of Nursing requires a child abuse clearance.

Orientation to Clinical Facilities for Students

Faculty should attend orientation at least one (1) week prior to taking students to the unit, and faculty should provide information, such as clinical objectives, to the clinical facility educator or nurse manager.

- Reserve a room at the hospital/clinical facility for orientation.
- Tour the facility with the students whenever possible.
- Devise scavenger hunts, which help the student find items on the unit where they will have their clinical experience.
- Describe a typical day one might experience on the clinical unit.
- Review the course syllabus, clinical paperwork, and other assignments as appropriate.

Prior to the orientation, faculty should work with the Clinical Coordinator and Course Lead faculty to make arrangements to obtain the following:

- Name badges
- Parking passes
- Computer passwords
- Computerized documentation access
- o PYXIS/electronic medication dispensing system codes
- Point of care testing

Clinical Supervision

If the clinical instructor is not familiar with the hospital or specific unit, the instructor should spend a half-day at the agency shadowing the staff, orienting to the environment. Duties of clinical faculty on a typical day are as follows:

- Arrive before students
- Retrieve each student's patient information.
- Find out the names of the staff nurses with whom the students will be working.
- Hold a conference with each student at the beginning of the shift to verify arrival and answer relevant questions.
- Utilize resources such as hospital libraries and the Internet to look up specific diseases and/or health conditions to share information with students.
- Remain in the clinical area (unit) at all times. If for any reason the clinical faculty must leave the area (unit), notification to the students and charge nurse is mandatory. If the time from the area is to extend beyond 15 minutes, the students must leave with the clinical faculty.

Dress Code

Faculty will adhere to the hospital/facility dress code as appropriate. A name badge should be visible and worn with professional dress at all times. It is highly recommended that faculty follow the same dress code as the students.

General Information

If a student misses a clinical experience, the faculty member must immediately notify the course coordinator to discuss ramifications.

- Students are expected to follow Essential Functional Abilities to progress in the nursing program. If a student is unable to meet core performance standards, the faculty should notify the course coordinator.
- When possible, faculty should thank staff nurses who worked with students at clinical.
- Faculty should remind students not to use or carry cell phones during a clinical experience.
- Faculty must not leave the hospital until all of the students in the group have left the clinical agency.
- If there is an accident or exposure to infectious material, follow the policy of the agency as well as the policy in the Student Handbook. Incident report form can be found under <u>FORMS</u>.
- Students must follow the uniform policy as outlined in the Student Handbook.
- Feedback should be provided in a timely fashion on all student care plans, documentation, and clinical paperwork. Clinical paperwork should be reviewed and returned to the student before the next clinical experience. Timeliness is essential for enhancing student performance.
- Regularly upgrade graded assignments in the course blackboard.
- Follow-up on any clinical issues and incidents. If an incident occurs in the clinical setting, follow the
 policy of the agency to report the incident. Keep the Undergraduate Chairperson and Course
 Coordinator apprised of any serious student problems. Utilize the <u>"Student-Instructor Conference Sheet"</u>
 (Appendix B, HUSON Student Handbook) for documentation of exceptional student behaviors and noncritical events, either positive or negative.
- Obtain a copy of the didactic course calendar in order to facilitate reinforcement of didactic content in the clinical setting.
- Be aware that while all students are assigned an academic advisor, some may ask you questions about the curriculum. Familiarize yourself with the suggested sequence for progression in the nursing program (See School of Nursing Handbook).

- If you observe behavior that indicates a student is in distress, approach the student with your concerns. You may also refer students to the Student Counseling Center for assistance. Notify the Lead Faculty regarding your concerns.
- Stress that it is extremely unlikely a clinical will be cancelled, let out early or delayed. Generally, a clinical will only be cancelled or postponed if the campus closes or classes are delayed due to inclement weather or an emergency. Faculty should inform students that they are not to be called about cancellations. Instead, students should visit the HU website, watch the local news reports or call the school for information about campus-wide delays or cancellations. Although clinical experiences are rarely cancelled, faculty should obtain each student's contact information and establish a Phone Tree on the first day of a rotation in the event of a cancellation.

Clinical Conferences

Reserve rooms prior to the start of the semester for clinical conferences.

Conferences should be regularly scheduled with students. A conference is a block of time set aside for students in the clinical group to gather together and discuss their experiences. Clinical conferences should last for 45–60 minutes. A faculty member can establish a conference time based on the schedule of the clinical unit. Faculty are encouraged to meet with students at the beginning of the shift and at the end of the clinical day.

Some ideas for clinical conferences:

- Inviting speakers from other disciplines (respiratory therapists, pharmacists, nutritionists, social workers, etc.)
- Discuss the students' patients.
- Practice giving verbal reports.
- Encourage clinical reasoning by asking application and analysis questions.
- Ask students to present interesting disease processes or patient situations.
- Review research articles on relevant clinical topics (Evidenced Based Practice).
- Facilitate a reflective activity (Journaling).
- Discuss ethical issues/implications related to a clinical case or client population.
- Discuss didactic course material (review NCLEX questions).

Clinical Evaluation

Faculty members will conduct a daily formative evaluation as well as a midterm and final summative evaluation. Check with individual course coordinators regarding the practice in a particular course. Also, it is important to informally evaluate each student throughout the clinical experience. When evaluating students, faculty should assist them with setting goals for successful performance and encourage them to conduct weekly self-evaluations and formal evaluations.

If a student is performing unsatisfactorily in the clinical setting, the clinical faculty should establish a remediation plan using the faculty-student consultation record. A student who is failing should be formally notified in writing before 50% of the course has been completed. Students should never be surprised they are receiving a failing grade. Clinical faculty must ensure students have completed the mandatory 10 hours of clinical skills practice when scheduling remediation.

Additional Information

- Faculty is advised **not to** make pre-assignments (patient assignments); nurses do not obtain their daily work assignments the day before and make assignments for the following clinical day. Try to assign students patients with conditions that correspond to course content (see didactic course calendar).
- Faculty will have 8–10 students in a clinical group (this depends on the agency and the clinical rotation).
- After the clinical experience day, clinical faculty must collect student evaluations (students must complete the top portion of the form). Faculty are clinical facilitators, but students must take an active role in their learning and be accountable and responsible to their patients. In order for faculty to assist students, the lines of communication should be kept open between faculty and students. Therefore, faculty should promptly provide feedback, both positive and negative, in a manner that is not intimidating or demeaning.

Clinical Forms Packet

- 1. Instructions for Completing Clinical Evaluation
- 2. Daily Clinical Evaluation
- 3. Clinical Hour Tabulation & Grade Recording Sheet
- 4. Summative Evaluation Tool
- 5. Mid-Term Clinical Evaluation
- 6. Final Clinical Evaluation

Daily Clinical Evaluation (Formative)

Students

- Students are to complete the top portion of the daily clinical evaluation tool each day they are in the clinical setting (i.e. lab, clinical agency) and submit completed form to the clinical faculty at the end of the clinical day.
- Students must achieve at least 78% or better for satisfactory clinical performance each clinical day. Remediation is necessary for evaluations receiving less than 78%.

Faculty

Clinical grades will be assigned based on the following:

Grading

Clinical performance represents 75% of the overall clinical grade. Assignments (i.e. documentation, projects, etc.), Nursing Care Plans, and Clinical tests (i.e. dosage calculations, pre & post clinical competency assessment) represent 25% of the overall clinical grade.

Grading Rubric

Content	Percentage
Clinical Performance	75% (.75)
Dosage Calculation Test (First Score only)	5% (.05)
Clinical Test (pre-post)	5% (.05)
Nursing Care Plan	5% (.05)
Assignments (Ex. documentation (EHR Tutor), projects) 10% (.10)	
Total	100%

Daily Evaluation Form Rating Scale

Rating Scale (E, A, B, U)

This scale will be used to assign a rating for each of the identified competency areas on the Daily Evaluation Form: Management of Care, Teaching and Learning, Psychological Integrity, Documentation and Communication, Health Promotion and Maintenance, Physiologic Integrity, Nursing Process and Caring Interventions. As necessary, Simulated learning experiences may be used for competency assessment (may not be used on a daily basis). Ratings are assigned against each competency independently. To be successful, *Students should aim for a daily grade of 84% or greater.*

E	Exemplary- Functions at or above expected for the clinical level	
Α	Accomplished-Perform skills or has knowledge deficit in areas expected for clinical level, requires	
	minimal guidance	
В	Beginner- Demonstrates behavior with supervision/guidance	
U	Unsafe -Is unable to perform skills, has knowledge deficit in areas expected for clinical level,	
	performs unsafe practice, inappropriate behavior, unable to complete tasks.	

Daily Grade Compute

- Clinical faculty will review student response in "Student Section" of form.
- Faculty will assign ratings (E, A, B, U) based on identified criteria assigned to each competency (See "Competencies Defined" section of form).
- Instructor/Preceptor rating section will be computed by the clinical faculty.

- Daily Evaluation is based on achievement of the 9 identified competencies or simulated learning experience.
- The expected level of achievement for each of the 9 competency areas (Management of Care, Teaching and Learning, Psychological Integrity, Documentation and Communication, Health Promotion and Maintenance, Physiologic Integrity, Nursing Process, Caring Interventions and Professionalism) is Beginner in Level I & II courses, and Accomplished at Level III.
- Example: **Midterm and Final Grade Computation**: are computed based on competencies that are applicable for the learning experience(s). Faculty will note N/A in areas that do not apply on the identified areas only.
- Number and Type (Clinical Simulation (CS) or Clinical Agency (CA)) of clinical hours completed, daily, will be recorded on the "Clinical Hour Tabulation and Grade Recording Sheet".

Clinical Tests

Students must successfully complete a **dosage calculation test** at the beginning of each clinical course, only the first grade will be recorded as a part of the overall **clinical grade**. **Any student unsuccessful on the test must remediate prior to retaking the assessment**. Students must successfully pass the assessment prior to entering any clinical agency.

Pre & Post Clinical Experience evaluation of clinical skills will be in the form of return demonstration and/or written test. These tests may be administered upon entry into the clinical course and as a part of the final clinical evaluation.

Assignments (Daily Clinical Requirements)

- As a part of clinical performance, students will be required to document a physical assessment in EHR Tutor on an assigned client each day (based on Level students may be required to document on multiple clients). Faculty will grade the student's documentation and assign a numerical grade using the EHR Tutor program (Feedback on student documentation can be done within the EHR Tutor program.). This assignment may vary in the specialty clinical courses (e.g. Mental Health, Community Health).
- Students will be required to document on a priority nursing diagnosis to include identified outcomes (short/long-term) with at least 6 interventions (1-observation, 4-actions and 1-teaching) with rationale statements and appropriate citation documentation.

Care Plans

Students will complete 2 comprehensive nursing care plans (One prior to midterm and one 2-week
prior to the end of the semester. Grading and inclusion criteria are established by clinical faculty
and course level.

Additional Assignments

Other daily requirements may be established by clinical faculty and course level. These are unique to a particular clinical setting and at the discretion of the faculty.

Clinical Remediation

Students who do not meet the minimum required Score of 78%, satisfactory performance, in the clinical setting will be required to set up a remediation plan with the clinical faculty/clinical lab staff within two weeks of the identified deficit and must demonstrate satisfactory performance in the clinical setting to receive a passing grade in the course.

- Faculty will initiate remediation plan using the **Faculty-Student Consultation Record** found in this packet. A copy of the completed form will be maintained in student permanent record.
- Faculty will meet with student to discuss plan and obtain student signature.
- A follow up meeting is scheduled once student has fulfilled requirement(s) of the remediation plan.

Mid-Term & Final Evaluation (Summative)

Midterm Clinical Evaluation

- Faculty will complete the HUSON Summative clinical evaluation tool for each student enrolled in the clinical group.
- Student and faculty will complete the Midterm Evaluation Form.
- Clinical Performance grade will be calculated based on student performance on all areas of the
 midterm summative clinical evaluation form. Using the assigned percentages, final grades will be
 calculated based on the summative clinical evaluation, dosage calculations test (1st attempt only),
 Nursing Care Plans, pre- and post-clinical tests, and Assignments.

Example: Mid-Term Grade Calculation

Content	Grade Earned	Percentage	Computed Points
Clinical Performance	78.12	.75	58.59
Dosage Calculations Test (1st attempt)	85.00	.05	4.25
Clinical Test (pre-post)	100	.05	5.00
Nursing Care Plan	74	.05	3.7
Assignments (4): 68,74,74,76= 292	73	.10	7.3
292/4 = 73	(computed avg. of 4 assignment grades)		
Total (Mid-Term Grade)			78.84 = Grade
			of "C+"

Final Clinical Evaluation

- Faculty will complete the HUSON Summative clinical evaluation tool for each student enrolled in the clinical group/course.
- Faculty will complete the Final Evaluation form for each student. Students input are optional (highly recommended).
- Clinical Performance grade will be calculated based on student performance on all areas of the final summative clinical evaluation form. Using the assigned percentages, final grades will be calculated based on the summative clinical evaluation, Dosage Calculation test, pre- and post-clinical tests, Nursing Care Plans, and Assignments.

Instructor / Preceptor Section Explanation Management of Care Expected — S Health Promotion and Maintenance Expected — S -Incorporates the clients developmental stage and chronological stage - Collaborates with multi-disciplinary health team members in the management of clients with actual or potential health problems into client care - Utilizes current technology to assess and provide care - Identifies health screening re: primary prevention and secondary - Plans, organizes, directs and evaluates delivery of nursing care to clients with prevention complex health care needs in a variety of acute care settings a) Applies - Performs physical assessment according to school and agency standards principles of time management, b) Prioritizes tasks and c) Conducts rounds to - Incorporates lifestyle choices in care of clients identify changes in clients' status Physiologic Integrity Expected -S- Maintains client rights Basic Care and Comfort - Maintains client confidentiality and privacy -Plans, Implements, and evaluates care inclusive of clients basic care and - Participates in continuity of care comfort needs - Identifies priorities Pharmacological Therapies - Incorporates ethical and legal principles -Calculates medication dosages accurately* - Maintains safe client care environment -Teaches client about prescribed medications* Teaching and Learning Expected — S -Administers medications safely per agency and school policy * - Evaluates and provides for the educational needs of adult clients with complex -Manages intravenous infusions according to agency policy* health care needs and their families -Evaluates medication reconciliation as necessary - Participate in activities that promote professional development and personal growth Reduction of Risk Potential -Incorporates client laboratory and diagnostic outcomes into client care - Pursues the role of the nurse as a change agent - Participates in on-going educational activities to maintain competency -Plans client care specific to diagnostic tests, procedures, and surgery - Reports changes/abnormalities in client status to faculty and staff* - Seeks new learning experiences - Participates in clinical conferences - Performs therapeutic procedures according to standards of care* - Performs focused assessments based on client status* **Psychological Integrity** Expected -SPhysiological Adaptation -Integrates client coping mechanisms -Plans and implements care for clients experiencing stable acute and - Integrates client support systems into the plan of care chronic alterations in body systems function * - Demonstrates respect for cultural diversity -Participates in planning and implementing care for clients experiencing - Supports client in situations of grief and loss

- Incorporates principles of stress management into client care **Documentation and Communications** Expected — S

- -Discriminates and thoroughly documents assessment data on agency forms
- Initiates care plans using agency forms when appropriate
- Independently documents the clients' responses to the expected Outcomes

- Incorporates client spiritual and religious needs in the plan of care

- Role models professional communication in all interactions
- Selects appropriate professional communication skills to manage care for clients and families a) Communicates with physicians and other health care personnel to address clients' needs, b) assists the RN in the interpretation and transcription of physician's orders, c) delivers a comprehensive change of shift report, d) communicates effectively via telephone, fax or computer, e) Interacts with clients' families to provide information and support and f) handles conflict appropriately

Simulation

Expected — S - Act with integrity, consistency, and respect for differing views (i.e. honesty, punctuality, courtesy, respect, ethics and morality, positive attitude and willingness to learn, receptiveness to constructive feedback and civility).

unstable acute and chronic alterations in body systems function/

- -Adherence to HUSON clinical dress code (wears appropriate, neat, clean and well maintained clothing for clinical).
- Demonstrates professional personal hygiene and grooming (i.e. no cologne or perfumed lotions, no visible tattoos or piercings)
- Wears Hampton University identification badge.

unexpected therapeutic responses

- Notifies faculty appropriately in the event of absence or tardiness.
- Maintains appropriate level of tone and volume of conversation in the therapeutic environment.
- Follow communication practices that promote safe handoffs among providers and across transitions in care.

Nursing Process Expected -- S

- Evaluates normal vs. abnormal assessment findings utilizing critical thinking skills
- Analyzes comprehensive assessment data to develop a plan of care using agency
- Prioritizes nursing diagnoses
- Develops individualized expected outcomes based on nursing diagnosis using agency forms
- Evaluates clients' outcomes and revises plan of care in an acute care setting using agency forms
- Integrates research findings to provide safe nursing care for adult clients with actual or potential health findings.

Caring Interventions

- Supports the adult client and the family in the dying process.
- Maintains a caring and therapeutic relationship with clients and families in an acute
- Appraises opportunities to serve as a client/family advocate-Delivers care in a nonjudgmental, non-discriminating manner that is sensitive to the client's cultural diversity
- Implements an individualized, multi-disciplinary plan of care for 2 adult clients with actual or potential health problems
- Integrates complex nursing skills safely with increased autonomy for 2 adult clients: a) passes medications safely, b) Correlates lab values, medications, and signs/symptoms with clients' clinical diagnosis and c) Notes changes in the clients' conditions, reports and intervenes as indicated

Integrated Processes			
NURSING PROCESS	MIDTERM	FINAL	COMMENTS
Utilizes the nursing process, critical thinking, evidence-based information, and b	knowledge from the a	rts and sciences to sup	port sound clinical decisions
Evaluates normal vs. abnormal assessment findings utilizing critical thinking skills			
2. Analyzes comprehensive assessment data to develop a plan of care			
using agency forms.			
Prioritizes nursing diagnoses			
4. Develops individualized expected outcomes based on nursing diagnosis using agencyforms.			
5. Evaluates clients' outcomes and revises plan of care in an acute care			
setting using agencyforms.			
6. Integrates research findings to provide safe nursing care for adult clients with actual or potential health findings.			
CARING INTERVENTIONS	MIDTERM	FINAL	COMMENTS
Plan and implement nursing care in a safe, compassionate, culturally sensitive			omotes growth of individuals and families
Supports the adult client and the family in the dying process.			
2. Maintains a caring and therapeutic relationship with clients and families in			
an			
acute care setting 3. Appraises opportunities to serve as a client/familyadvocate			
Appraises opportunities to serve as a cheritrianning advocate Delivers care in a non-judgmental, non-discriminating manner that is			
Sensitive to the client's cultural diversity.			
5. Implements an individualized, multi-disciplinary plan of care for 1-3 adult			
clients with actual or potential health problems.			
6. Integrates complexnursing skills safely with increased autonomy for 1-3			
adult clients.			
a. Passes medications safely			
b. Correlates lab values, medications, and signs/symptoms with			
clients' clinical diagnosis. c. Notes changes in the clients' conditions, reports and intervenes as			
indicated.			
COMMUNICATIONS AND DOCUMENTATION Collaborate with individual	als, families, and healt	thcare team members in	n providing comprehensive, individualized patient care
Communicates effectively through verbal, nonverbal, written, and techn	ological means with	individuals, families,	, and healthcare team members
Discriminates and thoroughly documents as sessment data on agency forms			
Initiates care plans using agency forms when appropriate			
Independently documents the clients' responses to the expected			
Outcomes 4. Pala modela professional communication and behaviors in all			
Role models professional communication and behaviors in all interactions.			
incraciions.			

ESSENTIAL COMPETENCIES	MIDTERM	FINAL	COMMENTS
5. Selects appropriate professional communication skills to manage care for clients and families.			
 a. Communicates with physicians and other health care personnel to address clients' needs. 			
 b. Assists the RN in the interpretation and transcription of physician's orders 			
c. Delivers a comprehensive change of shift report.			
d. Communicates effectively via telephone, fax or computer			
e. Interacts with clients' families to provide information and support			
f. Handles conflict appropriately			
TEACHING/LEARNING	MIDTERM	FINAL	COMMENTS
Utilize teaching and learning processes to protect, promote, and mainta	ain health for individu	als and families acro	oss the healthcare continuum
Evaluates and provides for the educational needs of adult clients with complex health care needs and their families			
Participate in activities that promote professional development and personal growth			
3. Pursues the role of the nurse as a change agent.			
4. Participates in on-going educational activities to maintain competency			
5. Seeks new learning experiences			
6. Participates in clinical conferences			
PROFESSIONALISM	MIDTERM	FINAL	COMMENTS
Identify interdisciplinary teamwork in professional practice utilizing the		ude ethical and safe	care, problem solving and critical thinking.
Verbal participation during pre- and post-simulation experience during	debriefing		
1. Act with integrity, consistency, and respect for differing views (i.e. honesty,			
punctuality, courtesy, respect, ethics and morality, positive attitude and willingness to learn, receptiveness to constructive feedback and civility).			
2. Adherence to HUSON clinical dress code (wears appropriate, neat, clean and well maintained clothing for clinical).

Risk Management Procedure

Definition: Risk Management is a process to be followed when accident/injury or potential exposure to infectious diseases occurs. The following algorithm has been created as a procedure for students who experience an injury during clinical hours, or experience a potential exposure to infectious disease. Follow institutional policies on meticulous use of personal protective devices. See below for steps to follow. **Student health insurance is mandatory. Student must carry proof of insurance at all times while attending clinical, and provide it when necessary.** *Hampton University School of Nursing will not be held liable for any expenses incurred by such an incident.*

Potential Infection Exposure	Injury During Clinical
Examples	Examples
• TB	Soft tissue injury (burns, cuts, etc.)
• HIV	Skeletal/neurological injuries
• Hep C	Exposure to chemicals/toxic exposure
Hep A	Assault/physical or emotional
	Needles sticks

- 1. Guidelines for Use of Clinical Skills Checklist
- 2. Clinical Skills Checklist Across the Curriculum (Forms)

- 1. Clinical skills checklist will be distributed in the Nursing Foundations: Practicum [NUR (V) 216] Course.
- 2. Student will be responsible for keeping track of the clinical skills checklist throughout the semester. Students are required to bring their skills checklist to each lab/clinical experience.
- 3. At the end of each nursing clinical course each student will submit the clinical skills checklist to their clinical faculty; the clinical faculty will submit the skills checklist to the lead faculty of the course.
- 4. The lead faculty member for each clinical course will place the skills checklist in a designated folder housed in the clinical skills lab.
- 5. At the beginning of each new clinical course, the lead faculty member will retrieve the clinical skills checklist from the designated folder and distribute them to each student.
- 6. Only faculty, adjunct faculty, and HUSON approved preceptors can sign students off on clinical skills.
- 7. In order for the clinical skill to be marked as complete, the faculty, adjunct faculty, or HUSON approved preceptors must date, and initial the specified block for each skill completed.
- 8. Faculty, adjunct faculty, or HUSON approved preceptors must also initial, print, and sign the last page of the clinical skills checklist.
- 9. Each student must receive two satisfactory performances on all required skills in the clinical lab prior to performing the skill in the clinical setting.
- 10. Students who do not satisfactorily complete a required clinical skill in the clinical lab are required to complete remediation. Self-remediation will be completed using one of the following: media, practice, or reading. Once remediation has been completed, the student must re-demonstrate the skill to the nursing faculty member and perform the skill satisfactorily. If the student is unsatisfactory the second time, one-on-one remediation with designated faculty is required.

SECTION 6 - PRECEPTED/OBSERVATION EXPERIENCE COMMITMENT FORM

- 1. Purpose of the Preceptorship
- 2. Definition
- 3. Objectives
- 4. Methodology
- 5. Accountability
- 6. Student Responsibilities
- 7. Preceptor Responsibilities
- 8. Faculty Responsibilities
- 9. Preceptor Educational/Employment Information
- 10. Preceptor Evaluation of Precepted/Observation Experience

A preceptorship is an individualized teaching/learning method in which a student is assigned to a particular preceptor/facility to experience day to day practice with a role model and resource person immediately available with the clinical setting. (*Virginia Board of Nursing Education Advisory Committee, 1996*). Preceptorship programs have been recognized as valid clinical teaching models in the United States since the 1960s.

School of Nursing at Hampton University

- <u>Accreditation</u>: The Bachelor of Science degree in Nursing (BS) program at Hampton University is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).
- <u>Mission:</u> The mission of the School of Nursing is to maintain the highest quality of professional nursing education at all levels. The program focus on serving an increasing diverse student population while becoming the premier producer of multicultural nurses with an advanced degree with a focus on family health within the global context.

Purpose of the Preceptorship

- 1. Facilitate students' application of theory to practice under the supervision of a licensed registered nurse.
- 2. Expose students to the reality of the work environment of the registered nurse.
- 3. Facilitate development of appropriate deductive reasoning skills and time management.
- 4. Assist in the development of a partnership between education and community health facilities.

Definition

Preceptor: A licensed health care provider, who is employed in a clinical setting, serves as a resource person and role model, and is present with the nursing student in that setting. (18VAC90-20-90; 18VAC90-20-95; 18VAC90-20-96).

Virginia Board of Nursing Regulations (18 VAC 90-20-95) state the following:

- A. Clinical preceptors may be used to augment the faculty and enhance the clinical learning experience. The clinical preceptor shall be licensed at or above the level for which the student is preparing.
- B. When giving direct care to patients, students shall be supervised by faculty or preceptors as designated by faculty. In utilizing preceptors to supervise students, the ratio shall not exceed two students to one preceptor at any given time.
- C. Faculty shall be responsible for the designation of a preceptor for each student and shall communicate such assignment with the preceptor. A preceptor may not further delegate the duties of the preceptorship.
- D. Preceptorship shall include:
 - 1. Written objectives, methodology, and evaluation procedures for a specified period of time;
 - 2. An orientation program for faculty, preceptors, and students;
 - 3. The performance of skills for which the student has had faculty-supervised clinical and didactic preparation; and the overall coordination by faculty who assume ultimate responsibility for implementation, periodic monitoring, and evaluation.
 - 4. The overall coordination by faculty who assume ultimate responsibility for implementation, periodic monitoring, and evaluation

Objectives

- 1. Apply theoretical knowledge by utilizing critical thinking skills, and clinical judgment in meeting health care needs of human beings.
- 2. Apply informed ethical decision-making skills to serve as an effective client advocate within a contemporary multicultural health care environment.
- 3. Utilize nursing knowledge in a variety of settings to assist culturally and developmentally diverse populations in the healthcare setting.

- 4. Utilize verbal and written communication skills while engaging in interdisciplinary collaboration to provide safe and effective care.
- 5. Demonstrate responsibility, accountability and professionalism for nursing practice decisions while utilizing the nursing process to improve patient outcomes.

Methodology

- 1. Precepted experience will be arranged by the faculty/clinical coordinator and educator/designee of the respective agency.
- 2. Orientation of the facility will be facilitated by the course faculty per agency guidelines.
- 3. Orientation to the unit/department will be guided by the clinical faculty/preceptor.
- 4. Precepted observational experience includes various units within a health care agency and the community.
- 5. Preceptor to student ratio shall not exceed two students to one preceptor at any given time (18VAC90-20-95).
- 6. Faculty/clinical coordinator will make periodic visits to the site during the precepted experience.
- 7. Students will review the *Clinical Skills Checklist Across the Curriculum* form with the preceptor at the beginning of the precepted/observation experience.
- 8. Students will be evaluated by the preceptor at the end of the precepted experience.

Accountability

Student-preceptor relationship

- 1. The student does not work on the preceptor's license. No one works under another's license
- 2. The student is exempt by law to practice nursing incidental to the educational process (54.1-30001 Code of Virginia; Regulation 18 VAC 90-20-96. Clinical practice of students). The standard of care must be the same as rendered by the RN.
- 3. The preceptor has the responsibility to delegate according to the student's abilities and to supply adequate supervision.
- 4. Under the law, each person is responsible for his/her own actions.

Student Responsibilities

During the precepted/observation experience, the student will:

- a. Participate in an agency and unit orientation.
- b. Comply with agency/university policies regarding matters of professionalism and confidentiality.
- c. Provide safe and effective care to assigned clients.
 - 1. The student does not work on the preceptor's license. No one works under another's license.
 - 2. The student is exempt by law to practice nursing incidental to the educational process (54.1- 30001 Code of Virginia; Regulation 18 VAC 90-20-96. Clinical practice of students). The standard of care must be the same as rendered by the RN.
 - 3. The preceptor has the responsibility to delegate according to the student's abilities and to supply adequate supervision.
 - 4. Under the law, each person is responsible for his/her own actions.
- d. Maintain a copy of Clinical Skills Across the Curriculum form and share with Preceptor at the start of the precepted clinical experience.
- e. Utilize the chain of command and communicate with preceptor and faculty any concerns that may arise.

The preceptor agrees to:

- a. Participate in an orientation to the precepted/observation experience
- b. Provide learning experiences for the student in the following areas: provision of quality care, leadership, and management;
- c. Provide direct supervision and learning experiences for the student to meet objectives in order to develop knowledge, skills and abilities in the role of the registered nurse.;
- d. Provide an environment of support, feedback and inquiry;
- e. Maintain open communication between student, preceptor and faculty;
- f. Verify practicum log hours; and
- g. Provide evaluation of the student's performance weekly, and at the end of the precepted/observation experience. Evaluation ratings used are as follows:

Exemplary	Functions at or above expected for the clinical level
Accomplished	Perform skills or has knowledge deficit in areas expected for clinical level,
	requires minimal guidance
Beginning	Demonstrates behavior with supervision/guidance
Unsafe	Performs to identify weaknesses or areas of knowledge deficit. Performs
	unsafe practice
NA or NO	Not applicable or Not Observed

Compliance Requirements for Preceptors

Hampton University School of Nursing abides by the appropriate compliance requirements and standards as determined by various state boards of nursing, national and professional nursing agencies. Therefore, we request preceptors agree to abide by the following standards and requirements.

- 1. Currently licensed in the state where the precepted clinical experience will occur with an active and unencumbered license.
- 2. Has a minimum of one year of experience.
- 3. Provide information on year of RN clinical experience, education (institution, degrees), and specialty area (certifications).
- 4. Is not the students' family member or a personal friend
- 5. Agree to engage in an on-site preceptor to student ratio of no more than 1:2 for direct student supervision at any given time.
- 6. Complete evaluations to assess the student's work during practicum and verify practicum time log hours.

Additional Resources for Preceptors:

The following additional resources can be found online at http://nursing.hamptonu.edu/page/Forms-and-Booklets

- School of Nursing Handbook
- Clinical Manual and Forms Packet

Faculty Responsibilities

Faculty will:

- a. Provide an orientation which includes: written objectives, methodology, and evaluation procedures for a specified period of time.
- b. Assure orientation is completed by preceptor and student;
- c. Be available to answer questions, problem identification and resolution;

- d. Seek feedback throughout precepted/observation experience;
- e. Make site visit to precepted/observation experience;
- f. Collect evaluations at the end of the precepted/observation experience;
- g. Complete the midterm and final summative evaluations of the student; and
- h. Notify lead faculty of student who have unsatisfactory performance.

Next Steps:

- After completing and signing this form, please give the original commitment form to the student. The student will upload this form in the course Blackboard.
- Please print legibly and provide your signature at the bottom of the form.

Preceptor Evaluation of Precepted/Observation Experience

Student:			Course: NUR(V)
Date:/		Time:	to
Facility:	Unit:		
Preceptor:			

Mark the box that most accurately reflects your thoughts about the students precepted/observation experience today. Your honest and candid feedback is essential to the students' success. Return the evaluation tool to the clinical faculty in a sealed envelope at the end of the experience.

Legend:

Exemplary	Functions at or a bove expected for the clinical level
Accomplished	Perform skills or has knowledge deficit in areas expected for clinical level, requires minimal guidance
Beginning	Demonstrates behavior with supervision/guidance
Unsafe	Performs to identify weaknesses or areas of knowledge deficit. Performs unsafe practice

		E	Α	В	U	NA or NO
1.	Provides and directs nursing care that enhances the care					
	delivery setting to protect clients and health care personnel.					
2.	Provides and directs nursing care of the client that incorporates the knowledge of expected growth and development principles, prevention and/or early detection of health problems, and strategies to achieve optimal					
	health.					
3.	Collects, analyzes, and prioritizes relevant physical, developmental, psychosocial, cultural, spiritual, and functional assessment data to provide individualized patient care					
4.	Ensures the physiologic integrity of clients by providing basic					
	care and comfort, administering pharmacologic and parenteral therapies safely, and reduces risks to clients.					
5.	Utilizes the nursing process, critical thinking, evidence-based information, and knowledge from the arts and sciences to support sound clinical decisions					
6.	Plans and implements nursing care in a safe, compassionate, culturally sensitive manner that preserves human dignity and promotes growth of individuals					
7.	Communicates effectively through verbal, nonverbal, written, and technological means with individuals, families, and healthcare team members					
8.	Utilize teaching and learning processes to protect, promote, and maintain health for individuals and families across the healthcare continuum					
9.	Demonstrates knowledge (cognitive, effective communication), attitudinal (positive, ethical, professional behavior), and psychomotor (skills) of the professional nurse.

Acknowledgment of Receipt of Guidelines for the Clinical Experience: Manual and Forms Packet

PLEASE SIGN AND RETURN THIS FORM TO:

- your assigned Clinical Faculty Instructor (students)
- or Lead Faculty Member (Clinical Faculty)

The *Guidelines for the Clinical Experience: Manual and Forms Packet* is available online through the Hampton University School of Nursing website forms page.

(nursing.hamptonu.edu/page/Forms-and-Booklets)

My signature below acknowledges that I have accessed the *Guidelines for the Clinical Experience: Manual and Forms Packet* as of this date. I have read the entire Manual and Forms Packet and have had all of my questions answered. I agree that I fully understand the Manual and Forms Packet before I begin my practicum. If I have any questions I agree that I will contact my assigned instructor or the program clinical coordinator and have my questions answered before taking any action. I further agree to complete and return this form before beginning my practicum.

I fully understand that the Manual and Forms Packet contains information that I will need during my time as a nursing student (faculty) at HUSON. I accept responsibility:

- For information contained in the manual and forms packet;
- Understand that I will be held accountable for my behavior and be subject to abiding by all guidelines established with the manual and forms packet.
