All individuals accessing Hampton University confidential or internal use data from a non-campus location, transporting such data off-campus on electronic devices must do so using the campus' Virtual Private Network (VPN). VPNs provide secure communications through the public internet. The Center for Information Technology's Networking department provides VPN service to secure remote access to the campus network using public internet to carry traffic. Requestors are required to read and agree to the campus Remote Computing Access Policy and Remote Computing Access Procedures on-line.
